

Patient Name	Priya Anand Menon
Age / Gender	34 Years / Female
UHID	APNM-PAT-00291847
IP Number	IP-2025-10847
Insurance Policy	POL-2025-GRP-CORP-00871 (Accenture Group Health)
Ward / Bed	General Ward — Room 412-B
Admitting Doctor	Dr. Kavitha Rajan, MD (Internal Medicine), Reg. No. MH-42891

ADMISSION & DISCHARGE

Date of Admission	17 June 2025 (Time: 09:45 hrs)
Date of Discharge	22 June 2025 (Time: 14:30 hrs)
Total Days	5 Days
Mode of Admission	Emergency — referred by Dr. S. Pillai (Cardiac OPD)
Condition at Discharge	Stable — advised home rest for 10 days

DIAGNOSIS

Primary Diagnosis: Acute Myocarditis (ICD-10: I40.9)

Secondary Diagnosis: Hypertension Stage II (ICD-10: I10), Mild Pleural Effusion (ICD-10: J90)

CLINICAL HISTORY

Patient presented to Emergency on 17 June 2025 with complaints of chest pain (4/10 scale), shortness of breath at rest, and fever (38.7°C) for 3 days. ECG on admission showed ST-segment changes in V3–V5. Echocardiography revealed mild LV dysfunction (EF 42%). Troponin-I was elevated at 1.82 ng/mL (normal <0.04). Patient was started on IV antibiotics, diuretics, and cardiac monitoring. Serial ECGs showed gradual normalisation over 48 hours.

TREATMENT SUMMARY

- IV Methylprednisolone 1g/day × 3 days
- IV Furosemide 40mg BD × 3 days, then oral
- Oral Ramipril 2.5mg OD (anti-hypertensive)
- Oral Carvedilol 3.125mg BD
- Continuous cardiac monitoring — no arrhythmia noted
- Pleural tap not required — effusion resolved on diuretics

INVESTIGATIONS SUMMARY

Investigation	Result	Reference Range	Interpretation
Troponin-I (Day 1)	1.82 ng/mL	< 0.04 ng/mL	ELEVATED
Troponin-I (Day 3)	0.28 ng/mL	< 0.04 ng/mL	TRENDING DOWN
Troponin-I (Day 5)	0.06 ng/mL	< 0.04 ng/mL	NEAR NORMAL
Echo EF	42% → 51%	55–70%	IMPROVED

CRP	88 mg/L	< 5 mg/L	HIGH
Serum Creatinine	0.9 mg/dL	0.6–1.2 mg/dL	Normal

BILLING SUMMARY

Room & Board (5 days)	■ 28,500
ICU Monitoring Charges	■ 12,000
Cardiology Consultation	■ 6,500
Medicines & Consumables	■ 18,240
Diagnostics / Lab	■ 9,100
Procedures	■ 4,200
Nursing & OT Charges	■ 3,800
Total Bill Amount	■ 82,340
Insurance Pre-Auth No.	PREAUTH-2025-APNM-00944
Amount Pre-Authorized	■ 80,000
Balance Payable by Patient	■ 2,340

DISCHARGE INSTRUCTIONS

- 1. Strict bed rest for 10 days — no physical exertion or stressful activity.
- 2. Follow-up with Dr. Kavitha Rajan in 7 days (OPD appointment booked for 29 June 2025).
- 3. Repeat Echo and Troponin in 4 weeks.
- 4. Continue prescribed medications without interruption.
- 5. Report immediately if chest pain, breathlessness, or fever recurs.
