

CyberSafe Labs LLP — Forensic & Security Services

Post-Incident IT Security Assessment Report

Ref: CSL-ASSESS-2025-00034
Date: 20 June 2025

Client	TechNova Solutions Pvt. Ltd.
Assessment Type	Post-Breach Forensic Review + Security Posture Assessment
Reference FIR	BKC-PS-2025-1902 (Bandra Kurla Complex Cybercrime PS)
Cyber Policy	POL-2025-CYBER-00041 — Accenture Insurance Services Ltd.
Assessment Lead	Parth Shah, CISSP, CEH — CyberSafe Labs LLP
Date	20 June 2025

EXECUTIVE SUMMARY

CyberSafe Labs was engaged on 05 June 2025 to conduct forensic investigation and security assessment following a data exfiltration event at TechNova Solutions Pvt. Ltd. The root cause was identified as an SIM-swap-enabled MFA bypass, combined with over-permissive IAM role assignments. This report presents findings, risk ratings, and remediation recommendations for insurance claim documentation and regulatory compliance.

VULNERABILITY FINDINGS

V-01	SMS-OTP used as sole MFA for privileged AWS console access	CRITICAL	REMEDIATED
V-02	IAM role 'CloudEngineer' had S3:GetObject on all buckets (wildcard)	CRITICAL	REMEDIATED
V-03	S3 bucket 'tn-customer-data-prod' had no versioning or object-lock	HIGH	IN PROGRESS
V-04	No Data Loss Prevention (DLP) agent on S3 exfiltration path	HIGH	OPEN
V-05	Backup export files contained unmasked PII (PAN, Aadhaar)	HIGH	REMEDIATED
V-06	CloudTrail log retention was 30 days (insufficient for forensics)	MEDIUM	OPEN
V-07	No VPC endpoint for S3 — traffic traversed public internet	MEDIUM	REMEDIATED

FORENSIC EVIDENCE PRESERVED

- AWS CloudTrail logs (30-day retention window): preserved in evidence S3 bucket with object-lock
- Network Flow Logs (VPC FlowLogs): captured and archived for 90 days
- Attacker IP addresses: 45.134.26.8 (RO), 91.211.88.4 (NL) — reported to CERT-In
- SIM-swap telecom records: requisitioned from Airtel via legal order
- Disk image of compromised EC2 instances: forensic copy maintained

CERTIFICATION FOR INSURANCE

CyberSafe Labs LLP certifies that:

- The incident described in CIR-TN-2025-00034 is a bona-fide cybersecurity breach as defined under IRDAI Cyber Insurance guidelines.
- The breach was not caused by willful negligence or intentional acts by TechNova employees.
- Financial losses claimed in CIR-TN-2025-00034 are reasonable and directly attributable to this incident.
- TechNova Solutions had reasonable security controls in place prior to the incident, consistent with industry standards for a company of their size and sector.
